-----

On the Settings tab > Detection and Protection sub tab, Detection Options, tick the box "Scan for rootkits". Click on the Scan tab, then click on Scan Now >> . If an update is available, click the

There is a remote buffer overflow in many versions of Microsoft Windows that allows attackers to execute arbitrary code with system privileges. The Microsoft RPCSS Service is

Given a recurring infection, there are 2 ways forward: Recover from a full drive backup that was made before this happened. Full wipe and reinstall. Nuke and pave as most people

Hi all, on start up recently of my PC VoodooShield blocks a temporary file launching from Windows Temp directory called init.bat. When I check on it in VT it says signed and

Screenshot of the specific progs below. You can disable it from startup in Task Manager. Or uninstall it via Apps & Features in Settings. As a precaution, consider using tools like

Since we are in the Security Arena now, there are some guidelines you need to follow, so the procedure will run efficiently and effectively. Here are they: 1. Always ask before acting.

Uncover it is a malware configuration extractor that can analyze files statically.

Edit: probably because of my mods, I'm trying to install litematica for 1.21 and malilib requires a special version (which doesn't exist) to work with litematica (18.999-sakura-2 or 18.999
